Cable length	5 m
Warranty	1 year
Part Number	AX-4K-VB

## Description:

AX-4k Video Bar is a next-generation professional video conference speaker that makes any online meeting participants feel as if they are having a face-to-face conversation. This innovative device has powerful features using artificial intelligence (AI), such as speaker tracking, group close-up, automatic framing, which certainly make video conferencing and business calls easier.

AX-4k Video Bar provides the highest video quality in 16:9 format with 4K Ultra HD 2160P resolution and an effective smoothness of 30 frames per second. High picture quality is further ensured by glass lenses and a high-end image sensor from a highly recognized manufacturer - Sony 1/2.8 inch CMOS.

In addition, it is equipped with a wide-angle lens that provides a field of view up to 120°, which is especially important when there are many people in the conference room. Innovative AI audio features, an integrated 5-element 180° microphone that captures sound from up to 5 meters away, and a high-end wideband speaker ensure top-quality online business communications.
